

SecureAware Compliance Analysis II

- *Is it time consuming to conduct internal audits?*
- *Would you like a simple way of documenting your compliance level in relation to your own policies, to ISO27002, to PCI DSS, or another standard?*
- *Is using spread sheets to manage security assessments policy difficult and resource-intensive?*

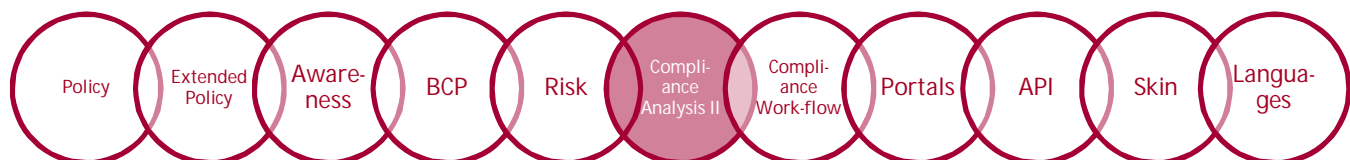

With SecureAware Compliance Analysis II, determining your company's level of compliance in respect to any security standard is simple.

Criteria questionnaires for ISO27002 and Neupart's own maturity check are included and any other standard can be imported. The module facilitates creation of your own questionnaires based upon your company-specific policies, rules or procedures.

SecureAware Compliance Analysis II enables you to set the exact parameters of your compliance check. Select only specific sections or policies for inclusion, and determine which employees you wish to complete the tests. You control who can read the automatically generated compliance and audit reports, and you can tailor the content and layout to match your specific requirements. Send out questionnaires and collate responses in several languages and generate automatic report in one language of your choice

Business benefits:

- ✓ Peace of mind: Determine your compliance level simply and at any time
- ✓ Security: Clear overview of how well your company meets your own security policy
- ✓ Optimised efficiency: Collates and structures compliance and audit documentation
