

Moving skin files after upgrading SecureAware to version 3.7.0

When SecureAware has been upgraded to version 3.7.0, please do the following:

- 1 Copy your skin files (the ones that have your company's name in the file name) from the folder:

C:\Program Files\Neupart\SecureAware3\webapps\ROOT\static\skin

to the folder

C:\Program Files\Neupart\SecureAware\webapps\ROOT\static\skin

- 2 Copy your skin files (the ones that have your company's name in the file name) from the folder:

C:\Program Files\Neupart\SecureAware3\webapps\ROOT\skin

to the folder

C:\Program Files\Neupart\SecureAware\webapps\ROOT\skin

- 3 Restart the SecureAware service

- 4 Restart the IIS if this is used.
